SUSHANT PATIL

Software Engineer | Spring Boot, Hibernate & REST API Development
Kolhapur, Maharashtra, India | +91 9371838751 | 2004sushantpatil@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate with strong foundations in Java, Spring Boot, Spring Security, Hibernate/JPA, REST API development, OOP, Data Structures & Algorithms, and MySQL. Experienced in developing backend-focused and full-stack applications, implementing secure authentication, database design, RESTful APIs, and business logic. Built an e-commerce application featuring role-based authentication, product and order management, and backend services. Seeking a Software Engineer role to apply strong programming fundamentals, problem-solving skills, and software development knowledge to build reliable, scalable applications.

CORE SKILLS

Languages: Java, C++

Backend: Spring Boot, Spring Security, Hibernate, REST APIs, JPA

Frontend: HTML, CSS, JavaScript

Database: MySQL (SQL)

Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, Postman, Maven

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

PROJECTS

Watch Store — E-Commerce Platform

Spring Boot, Hibernate, MySQL, Spring Security | GitHub

- **Built the backend** for a watch e-commerce platform using Spring Boot, implementing REST APIs for product catalog, search/filter/sort, cart, checkout and order history, consumed by an Angular frontend.
- **Designed a normalized MySQL schema** (users, products, orders, order items) with Spring Data JPA/Hibernate for persistence, and RESTful APIs to connect the frontend and backend.
- **Implemented Spring Security-based authentication** and role-based access control to protect application resources and separate user capabilities.

Digital Café System — Food Ordering Platform

HTML, CSS, JavaScript, Firebase | GitHub

- **Developed an online food ordering system** with a dynamic menu, cart and order-tracking functionality using JavaScript and Firebase.
- **Integrated Firebase Realtime Database** to store and sync order data, supporting concurrent orders with minimal latency.
- **Built a responsive, mobile-friendly UI** improving usability across devices.

ImageChat — Secure Messaging via Image-Based Encryption

Java, File Handling

- **Implemented an image-based steganography technique** to encrypt and transmit text messages securely between users.
- **Used Core Java and file-handling concepts** to encode and decode messages within image files while preserving the visible appearance of the images.
- **Applied byte/file processing concepts** to manage image input, message embedding, message extraction and output files.

EDUCATION

B.Tech, Computer Science and Engineering

D.Y. Patil Technical Campus, Talsande | June 2023 – June 2026 | CGPA 7.8

Diploma in Computer Science

D.Y. Patil Polytechnic, Kolhapur | May 2020 – May 2023 | CGPA 8.0
